HourTrack 2000 Software

HourTrack 2000 is a tightly integrated suite of Workforce Management modules. It has achieved a price/performance ratio that is unprecedented in the time and labor management industry, and is the new standard by which to measure all other solutions. Windows-based, scalable, fast, and built around a simple and intuitive interface, HourTrack 2000 enables companies to manage with precision, all aspects of employee time and attendance.

HourTrack 2000 is our traditional, client/server application (this means that you install and maintain the package in-house.) It performs a wide range of critical tasks including time keeping, job

**PROCESS PAYROLL UP TO 80%
FASTER WHILE SAVING UP TO 8% IN
PAYROLL EXPENSES**

tracking, employee scheduling, messaging and powerful reporting. And, it's all delivered to you through a refreshingly intuitive user interface. HourTrack 2000 can operate as a stand alone software-only system, or as part of a complete solution combined with our dependable hardware options.

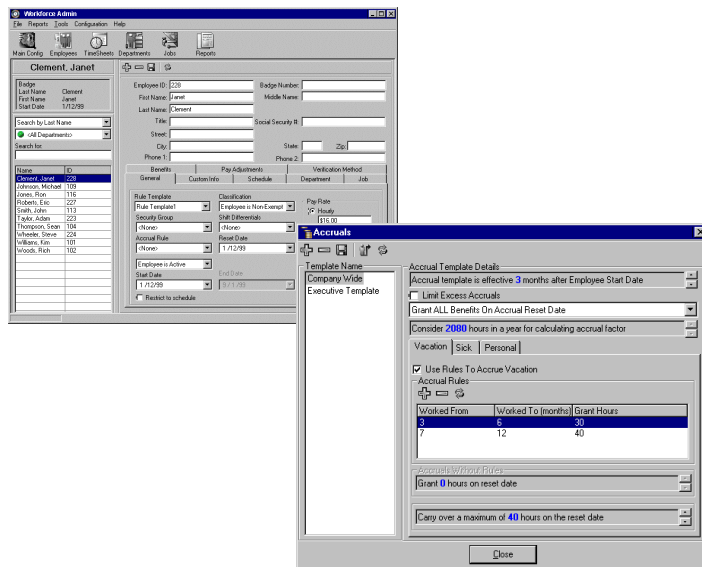

HourTrack has built its reputation upon a tradition of functionality, ease of use, and value. It extends this tradition to new levels by delivering more power than ever, more features than ever, and more stability than ever—all through a more intuitive user interface.
